ECOL 596 W
Present a Package Instructions

When: December 3rd and 5th
What you should prepare: a 5-10 minute presentation on a useful package
What you should turn in: A quarto or markdown .html file that provides a "quick start" guide to your package. Should be submitted as a pull request to the present_a_package folder in the class repo. Name it as: lastname_package.html

How to pick a package?
Consider packages that you would use in your particular field of study. They could be packages that you'd use for graphing, for particular types of data analysis, etc.

Some ideas:
-   vegan (community ecology)
-   deseq2 (gene expression)
-   sjPlot (formatting output tables)
-   shiny (for making interactive websites in R)
-   sf (for making maps)
